```java
1    package ancestor;
2
3    public class Person {
4
5        private int mom;
6        private int dad;
7
8        public Person(int mum, int dad) {
9            this.mom = mum;
10           this.dad = dad;
11       }
12
13       public void setMom(int newMom) {
14           this.mom = newMom;
15       }
16       public int getMom() {
17           return mom;
18       }
19
20       public void setDad(int newDad) {
21           this.mom = newDad;
22       }
23       public int getDad() {
24           return dad;
25       }
26   }
```
